28. Not every basilisk is huge. One legendary basilisk is a small snake _____ in length.

- ① no more 50 inches
- ② of no more than 50 inches
- ③ no more of 50 inches than
- ④ more of than 50 inches

29. You will look back on your life, and _____ accomplished, you will wish that you had lived differently.

- ① no mattering how much you have
- ② it does not matter how much have you
- ③ it matters not how much have you
- ④ no matter how much you have

30. After the 2002 elections, the first free and democratic elections held in nearly twenty-five years, the political climate _____.

- ① took in a better Kenya turn
- ② had taken Kenya in a better turn
- ③ in Kenya took a turn for the better
- ④ to the better for a turn in Kenya

31. All seemed well until the time reached ten minutes to ten and the hands of the clock shut together like a pair of scissors, _____ they traveled together.

- ① and from that time forth
- ② but since those times again
- ③ until that time from
- ④ that since that time from

32. For Ireland, the potato disease was a deadly blow. As the Irish depended on potatoes more than any other Western nation, _____.

- ① they hit the most seriously
- ② the most serious it was hit
- ③ that it was the most serious hit
- ④ they were the most seriously hit

33. He wondered if he and his family could live for one year without most of life's basic luxuries that _____.

- ① take us for grants
- ② we all take for granted
- ③ all of us are taking as a grant
- ④ take we all as granted

34. The discovery sheds light on how the tigers _____ the lands of Central Asia.

- ① crossed making their way
- ② made their across way

- ③ crossed to make their way
- ④ made their way across

Part III. 다음의 밑줄 친 부분 중 어법상 틀린 것을 고르시오. [35-50]

35. You should realize that she behaved in a way what is natural and appropriate in her own culture.

- ①
- ②
- ③
- ④

36. There were not much difference between the birds that had been walking around a bit on land and those that had

- ①
- ②
- ③
- ④

just landed.

37. In 1997, the chief manager of the zoo and the zookeepers

- ①

realized people would not come just to see birds in small cages and animals confining within concrete walls.

- ②
- ③
- ④

38. While spoken to people in rural communities, she

- ①

discovered that the government had cleared large areas of

- ②

forested land to make room for more commercial crop production.

- ③
- ④

39. Scent companies are expanding their repertoire by cooking

- ①
- ②

up smells that are meant not to charm but repelling.

- ③
- ④

40. Think twice before throw away your old computer or

- ①
- ②

mobile phone because there still can be many uses for it.

- ③
- ④

41. When our visitor has left us, with a pipe in his hand,

- ①
- ②

Holmes sat with his eyes closed, thinking the matter over.

- ③
- ④

42. In Western culture, particularly in the United States, the extrovert is considered socially superior to the introvert, as
 ① ②
he or she genuinely enjoys the company of other in large
 ③ ④
 groups.

43. Not only he has become highly involved in many
 ① ②
 campaigns, he has also met with several influential politicians
around the world to gain their support.
 ③ ④

44. The banana is the fourth larger agricultural product in the
 ①
 world, after wheat, rice, and corn. In the United States, people
 ②
 eat more bananas per year than apples and oranges combined.
 ③ ④

45. The benefits of traveling is immense. For one, it can help
 ① ②
 tourists open their eyes more actively to what is around them.
 ③ ④

46. Unlike in the past which designs focused only on
 ① ②
 practicality or beauty, today's designs consider the influence
 the products have on the society, culture, and quality of
 ③
users' lives.
 ④

47. Black pepper is one of the most widely used spice in the
 ①
 world. At first, it was cultivated in India as a simple
 ② ③
 ingredient for cooking.
 ④

48. I grew up listening to my mother, who's English was
 ① ② ③
grammatically incorrect.
 ④

49. Babies and young children thought to be the primary
 ① ②
 targets of the evil eye because they are so often adored and
 ③
praised.
 ④

50. Since large quantities of marbles could easily be produced,
 ① ②
 they were able to build impressive temples and stepped
 ③ ④
 pyramids.

Part IV. 주어진 글을 읽고 물음에 가장 알맞은 답을 고르시오.
 [51-60]

[51-53]

This is not the first time bananas have encountered a destructive disease. Fifty years ago, the "Gros Michel" banana plant was (A)_____ by a disease called "Panama Disease," a banana-killing fungus carried by soil and water. The disease was so bad that it wiped out the species. Therefore, banana farms around the world switched to the Cavendish, which was not affected by the disease. The switch proved satisfactory to farmers and consumers alike. Cheap and delicious, the Cavendish also has a lot of vitamins and minerals as well as a lot of fiber. [1] The Cavendish banana is the one most eaten around the world today.

[2] As early as the 1980s, a new, more dangerous breed of the disease called "TR4" (Tropical Race 4) first appeared in Taiwan, and went on to destroy 70 percent of its Cavendish population. [3] Since then, it has spread through South Asia, Australia, and parts of Africa. And it is now found in major banana exporting nations in Central and South America, including Ecuador, Costa Rica, and Colombia. [4] TR4 attacks the roots of the banana plant and cannot be (B)_____ by pesticide.

51. According to the passage, which of the following is true?
 ① The Cavendish banana is free from any disease.
 ② "Panama Disease" attacks the roots of the Cavendish banana.
 ③ The "TR4" disease wiped out 70 percent of the Cavendish banana in Taiwan.
 ④ Major banana importing nations are in Central and South America.

52. Which of the following would be most appropriate for the blanks (A) and (B)?

- | (A) | (B) |
|------------------|------------|
| ① struck | controlled |
| ② come | exported |
| ③ modified | satisfied |
| ④ sickened | worsened |

53. Which would be the best place to insert the following sentence?

Unfortunately, this success story did not last long.

- | | |
|-------|-------|
| ① [1] | ② [2] |
| ③ [3] | ④ [4] |

[54-56]

Limestone is found everywhere on Earth. These areas are very sensitive to weathering, which may create a specific landscape called a karst. Karsts are unique landscapes formed by the underground erosion of limestone by water. Karsts are formed over a long period of time, and they offer a great wealth of scientific and educational opportunities. Underground karst environments, in particular, can provide a relatively undisturbed window into landform evolution and past environmental conditions.

For a limestone landscape to develop into a karst landscape, several conditions are necessary. Calcium carbonate must comprise at least 80% of the rock. The rock must also contain pockets of air, and have a cover of thick vegetation. In karst landscapes, weathering is concentrated along the joints and bedding planes of the limestone, producing a number of different features. Rainwater made acidic by carbon dioxide in the atmosphere and soil slowly makes its way into cracks in the limestone, (A)_____ the rock. As with all weathering processes, time is a factor. Early in the 20th century, karst landscapes were understood to progress through evolutionary stages of development, as if they were aging. But today these landscapes are considered to be locally unique, a result of specific conditions. Mature karst landscapes do display certain characteristic forms.

54. What is the most appropriate title of the passage?

- ① How a karst landscape is formed
- ② How underground karst environments are found
- ③ How calcium carbonate comprises limestone
- ④ How weathering is developed

55. Which of the following can be inferred from the passage?

- ① Karsts are created in a short period of time.
- ② Limestone always develops into a karst landscape.

③ Karst landscapes are still believed to progress through evolutionary stages of development.

④ Weathering is crucial to the creation of a karst.

56. Which of the following would be most appropriate for the blank (A)?

- | | |
|------------|--------------|
| ① creating | ② dissolving |
| ③ admiring | ④ wandering |

[57-58]

When we observe chimpanzees learn to understand and express some simple messages in human language, we may be misled to believe that they can be trained to have a linguistic ability at the level of humans. But that's only wishful thinking. Attempting to teach linguistic skills to animals is totally (A)_____ - like trying to teach people to flap their arms and fly. Think about this. Humans can fly about 30 feet - that's what they do in the Olympics. Does the fact that they can fly 30 feet prove that they can fly like birds using wings? There is no evidence that the chimpanzees' learning a few signals has come from anything like the "language organ." Research shows that the language organ resides only in human brains. Therefore, we have to claim that language is innate and unique to humans.

57. Which of the following would be most appropriate for the blank (A)?

- | | |
|---------------|--------------|
| ① promising | ② proper |
| ③ indifferent | ④ irrational |

58. According to the passage, which of the following is true?

- ① Chimpanzees can be trained to fully understand human languages.
- ② Animals may have a language organ like humans.
- ③ Humans can't fly 30 feet even in the Olympics.
- ④ People may wrongly think chimpanzees can have linguistic ability.

[59-60]

While living in the Yellow House, Vincent van Gogh and Paul Gauguin had sharply contrasting views on important issues. All this turned harmony into frequent conflicts. Gauguin repeatedly pushed van Gogh to use his memory and imagination more. Although van Gogh tried to paint in Gauguin's manner, he was unable to change his style. The two artists found it hard to work together again. By mid-November, they no longer worked or ate together.

The conflicts between the two are evident in what they created. For instance, Gauguin's portrait of van Gogh depicts
