Part V. 주어진 글을 읽고 물음에 가장 알맞은 답을 고르시오.  
 [46-60]

Passage 1 [46-49]

Dr. Pickett, a Canadian entomologist, and his associates struck out on a new road instead of going along with other entomologists who continued to pursue the will-o'-the-wisp of the ever more toxic chemical. [1] Recognizing that they had a strong ally in nature, they devised a program that makes maximum use of natural controls and minimum use of insecticides. Whenever insecticides are applied only minimum dosages are used – barely enough to control the pest without avoidable harm to beneficial species. Proper timing also enters in. [2]

How well has this program worked? Nova Scotia orchardists who are following Dr. Pickett's (A) \_\_\_\_\_ spray program are producing as high a proportion of first-grade fruit as are those who are using (B) \_\_\_\_\_ chemical applications. They are also getting as good production. They are getting these results, moreover, at a substantially lower cost. [3]

More important than even these excellent results is the fact that Dr. Pickett's program is not doing violence to nature's balance. [4] It is well on the way to realizing the philosophy stated by G. C. Ullyett a decade ago: "We must change our philosophy, abandon our attitude of human superiority and admit that in many cases in natural environments we find ways of limiting populations of organisms in a more economical way than we can do it ourselves."

46. Which of the following is most suitable for the blanks (A) and (B)?

- ① prolific : resilient                      ② unvaried : varied  
 ③ indiscreet : discreet                    ④ modified : intense

47. Which is the most appropriate place for the sentence below?

Thus, if nicotine sulphate is applied before rather than after the apple blossoms turn pink one of the important predators is spared, probably because it is still in the egg stage.

- ① [1]    ② [2]  
 ③ [3]    ④ [4]

48. What are the two most important factors in applying insecticides in Dr. Pickett's program?

- ① maximum dosages and proper timing  
 ② proper dosages and early timing  
 ③ sufficient dosages and early timing  
 ④ minimum dosages and proper timing

49. Which of the following can NOT be inferred from the passage?

- ① Dr. Pickett and his associates believed that they had a strong ally in nature.  
 ② One of the advantages of the Dr. Pickett's program was that it produced positive results at a lower cost.  
 ③ G. C. Ullyett and Dr. Pickett saw eye to eye about ways to use nature.  
 ④ Dr. Pickett and his associates did not believe in the need to limit populations of organisms.

Passage 2 [50-52]

Every girl I met is amazing. I feel honored to share their stories and images – and their strength – with you: the look on Alice's face after she conquered the big hill on her bike and Aris's proud smile when she achieved her goal of becoming a pilot at just 16. It is my goal with these images to inspire girls and women to be their best selves, to challenge and test their limits. We all are constantly bombarded with (1) societal messages about how women and girls should act, look, or be, and processing (2) them in a healthy way can be hard even for a 40-year-old mother of two who knows better. I worry about what my girls and their friends are exposed to and how their opinions of their bodies and selves are being shaped by the internet, TV, and magazines. I want these images to combat (3) those negative voices that tell us we are not good enough, thin enough, or whatever enough; because (A) \_\_\_\_\_ I want these girls to be able to hear their own voices through these images, and to inspire them to use (4) them and continue to use them. *Loudly.*

of the tongue and pen, misquotations, bungled actions and so on. Gradually he became convinced that all of these normally (A) \_\_\_\_\_ slips and lapses betrayed the presence within the unconscious of repressed impulses. Most of the time they remained hidden, but occasionally they seized upon an opportune moment to make themselves known through some error of 'parapraxis'.

*The Psychopathology of Everyday Life* first appeared as a separate volume in 1904 and was subsequently enlarged over the next 20 years. It became one of Freud's most popular books, running into many editions. The core ideas and many of the best examples were later expressed more succinctly (and more convincingly) in the *Introductory Lectures on Psychoanalysis*, given at the University of Vienna between 1915 and 1917 and later published. Thereafter, the phrase 'a Freudian slip' entered the language, and the view that errors were unconsciously determined became firmly lodged, for good and ill, in scientific and popular belief.

57. Which of the following is NOT appropriate for the blank (A)?

- ① negligible                      ② unfrivolous
- ③ trifling                          ④ inconsequential

58. According to the passage, which of the following is NOT true?

- ① Both the *Introductory Lectures on Psychoanalysis* and *The Psychopathology of Everyday Life* were published.
- ② Freud began to gather the examples of minor slips and lapses after realizing their significance.
- ③ The idea that errors have their roots in the unconscious mind came from Freud.
- ④ While the scientific community accepted Freud's theory, the public thought it was preposterous.

59. According to the passage, why was Freud unable to remember the last name of the poet?

- ① The poet did not have a last name since infancy, so there was no last name to begin with.
- ② Freud was unable to forget the substitute names due to parapraxis.
- ③ Freud unconsciously held back the name because of his early memories.
- ④ The poet's name came up as a slip of the tongue, but Freud repressed it as a trivial lapse.

60. Which of the following best represents an opportune moment in the second paragraph?

- ① In speech, memory retrieval or action
- ② A retrieval of infantile parapraxis
- ③ In each form of psychoanalytic disorders
- ④ A repressed and unconscious memory
