and branches, so visitors who look up can feel as if they were ③
standing in a greatest forest. ④

Part IV. 주어진 글을 읽고 물음에 가장 알맞은 답을 고르시오.
[51-60]

[51-52]

Today, one of the major concerns around the world is the lack of clean water. Hadjara, a 10-year-old girl, spends much of her time walking and waiting for water. She gets up early four days a week to go collect water for her family. One day, Hadjara set out before dawn for a nearby spring, which is the closest water source to her home. Getting there involves a dangerous climb down a 700-foot cliff. She skipped breakfast, thinking she could arrive at the spring before most of the others and have a shorter wait.

Like Hadjara, nearly half the people in the world don't have clean water. Access to clean water means everything to them because water means health. In the past decade, more children have died from waterborne diseases than people who were killed in the Second World War. Water also means time. People spend 40 billion hours a year walking to get water in Africa alone. Additionally, water means education. Clean water helps keep kids in school. Spending less time collecting water or walking to find a bathroom means they can spend more time in class, creating more opportunities for their future. (A) _____, water can improve their lives and futures.

Have you ever given any deep thought to your relationship with water? Without water, how would your life change? Indeed, the most essential things in life, like water and air, appear easy to get. This may be why we often forget that they are the very things that some people desperately struggle to have. Look around and find out the most important things in your life. Without them, your life would be completely different than now.

51. Which of the following can be inferred from the passage?

- ① People around the world spend forty billion hours a year walking to get water.
- ② Children dying from waterborne diseases last year outnumbered people killed in the Second World War.
- ③ When kids spend less time collecting water, they will have greater opportunities for their future.
- ④ About two thirds of the people in the world have access to clean water.

52. Which of the following would be most appropriate for the blank (A)?

- ① Meanwhile
- ② Ultimately
- ③ Frankly
- ④ However
